<p>Acorn Squash</p>  A photograph of acorn squash. One is whole with its characteristic green and yellow mottled skin. Another is cut in half, showing the bright orange, hollow interior.	<p>Butternut Squash</p>  A photograph of butternut squash. One is whole, showing its tan, ribbed skin and elongated shape. Another is cut in half, revealing the orange flesh and seeds.	<p>Patti Pan Squash</p>  A photograph of patti pan squash. It includes a whole yellow one, a whole green one, and a green one cut in half to show its white interior.	<p>Spaghetti Squash</p>  A photograph of spaghetti squash. One is whole and yellow, and the other is cut in half, showing the fibrous, spaghetti-like strands inside.	<p>Swede</p>  A photograph of a swede, a root vegetable with a rounded, bulbous shape and a mix of purple and green skin.
<p>Sweet Potato</p>  A photograph of sweet potatoes. One is whole with its brown, fibrous skin. Two are sliced, showing the bright orange, moist interior.	<p>Tomatillo</p>  A photograph of tomatillos. There are three whole ones with their characteristic papery husks, and one is cut in half, showing its green, fleshy interior.	<p>Tomatoes</p>  A photograph of tomatoes. There are several whole red tomatoes on a vine, and two are sliced, showing their red, juicy interiors.	<p>Turnips</p>  A photograph of turnips. There are three whole ones with purple and white skin, and one is cut in half, showing the white interior.	<p>Water Chestnuts</p>  A photograph of water chestnuts. There are three whole ones with their dark, papery husks, and one is cut in half, showing the white, crisp interior.
<p>Yam</p>  A photograph of yams. One is whole with its rough, brown skin. Another is cut in half, showing the white, starchy interior.	<p>Zucchini</p>  A photograph of zucchini. There are three whole ones, showing their characteristic green skin and bumpy texture.
